Seminars for Image Processing & Analysis

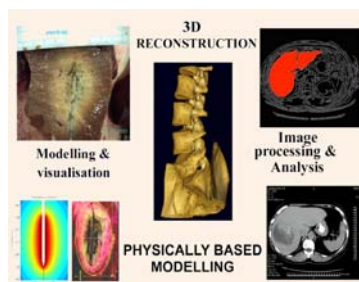

We offer training as an experienced laboratory in the field of the Image Processing and Analysis.

Depending on the knowledge of the training participants we train in different levels

- individual training
- basic courses
- introduction courses

The trainings can be held in English or in Lithuanian or in Russian language.

It allows to enter in the Image Processing and Analysis techniques to all participants, that will start with Machine Vision or improve their knowledge.

Cooperation request

Themes

- Machine Vision Training
- Know-how Transferring
