### Integrator in building machines

Our business activities include designing, construction and delivery of plants and equipment that are part of automated lines for industrial assembly (for the car, electrotechnical and domestic appliance branches). For many years now we have been a direct importer and distributor of the elements for construction of these plants and equipment, and while taking advantage of the experience of our renown suppliers, we prepare and construct all kinds of optimal and ergonomic workstands.

Thanks to experienced team of our designers and automatics engineers we are able to fulfil our customer's need regarding atypical construction solutions, integrated production equipment and systems, single and individual assembly stations, machines and equipments as well as automated production lines.

### Cooperation request

- For companies that builds applications at domain VISION Machines we offer components for building VISION system

- We supply solutions based on other firm and own solutions based on V & C sytem.
